

ergotron
HEALTHCARE

The image is a composite of two photographs. The left half shows a healthcare worker in blue scrubs from the chest up, looking at a computer monitor. The right half shows a hospital room with a patient bed, a mobile workstation on wheels, and a bedside table with a plant. The workstation has a large monitor, a keyboard, and a mouse. The bed is covered with a blue blanket. The bedside table has a small potted plant and a yellow cup. The wall has several electrical outlets and a fire alarm pull station.

***We are devoted to
helping caregivers thrive.***

For more than 40 years, Ergotron has improved healthcare workflows and enabled quality patient care by offering dynamic, ergonomic solutions designed for caregivers. Highly customisable, our designs fit more people, workflows and environments.

Support genuine patient connections and help reduce the risk of errors with the modular CareFit Combo System that enables an efficient and comfortable documentation experience at the point of care.
