

## Datacentre + Networking

# Wasabi Surveillance Cloud

**Instantly extend the capacity of your on-premises surveillance video management system (VMS) with this simple and secure hybrid cloud storage solution from Wasabi.**

### What is Wasabi Surveillance Cloud?

The proliferation of high-resolution cameras and stringent retention and compliance requirements are driving the need for larger storage capacities. Instead of investing in expensive storage hardware upgrades or ripping and replacing your current solution with an all-in-the-cloud solution, why not enhance your current solution with the ability to scale on demand?

Wasabi Surveillance Cloud is a bundle offering that integrates our WSC cloud bridge software application with a Wasabi hot cloud storage subscription. Users of every major video management system (VMS) now have the ability to offload video surveillance data from their local storage environment to the cloud without changes to their existing operations.

Wasabi Surveillance Cloud is the easiest way to transition to the cloud and the best, most predictable solution to support the exponential growth of video data.

### Built for simplicity, scale, security, and compliance

Wasabi Surveillance Cloud is deployed globally in top-tier data centers certified for SOC 2, ISO 27001 and PCI-DSS.

#### **Simplicity**

Installs in minutes and runs automatically in the background

#### **Scale**

The ability to scale on-demand, avoiding costly server upgrades while increasing resolution and frame rate

#### **Security**

Immutability to protect against ransomware or accidental deletions

# Wasabi Surveillance Cloud

## A seamless transition to cloud storage for video surveillance

In order to deal with rising storage costs to meet compliance or other business requirements, many enterprises are looking into new all-in-the-cloud solutions. If you're one of them, tell your provider that you want to save even more money by using Wasabi as your cloud storage target.

If you're not ready to rip out and replace the system that you know and have used for years, Wasabi Surveillance Cloud is the perfect solution. It creates a seamless hybrid storage environment to maximise and preserve your current investment.

- Avoid onsite provisioning of another storage server
- Scale on demand while reducing both capex and opex
- Free up space by archiving video to low-cost Wasabi cloud

Wasabi Surveillance Cloud meets all major industry and government regulatory and retention requirements, including HIPAA, CJIS, FERPA, FINRA, and more, making it an ideal solution for hospitals, law enforcement, education, security integrators, or any large enterprise.

## 2023 Best in Video Surveillance Data Storage

The SIA NPS Awards program, which are presented annually at ISC West, recognises winners in several product and service categories and presents the prestigious Judges' Choice and Best New Product awards.

Wasabi won for best new product under the Video Surveillance Data Storage category.

## See for yourself how easy it is to scale your existing video surveillance solution

Request to see Wasabi Surveillance Cloud in action as it integrates with a popular VMS and moves video to and from the cloud.

## Works seamlessly with all major VMS providers

Wasabi Surveillance Cloud is validated to interoperate with industry-leading video management systems to deliver the ultimate hybrid-cloud storage solution.
