Tech Refresh & Recycle Program

Dell Technologies provides the opportunity for our storage, data protection and CI/HCI customers to responsibly and sustainably recycle their aging Dell Technologies or competitive systems.

95% of customer Request for Proposals (RFPs) identified social impact criteria.

Dell Technologies Future-Proof Program helps customers optimize the IT lifecycle through a series of guarantees, offers and assurances.

3+ million assets managed by the Dell Tech Refresh & Recycle Program incentivize customers and sales to sustainably refresh gear.

Tech Refresh & Recycle

Data migration and data sanitization services are available for both Dell Technologies and competitive gear.

100% recycled packaging material
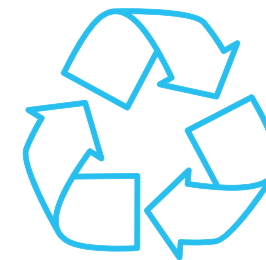

Near zero landfill performance

1.3M recovered rare magnets

Dell Technologies has set a 2030 social impact moonshot goal to reuse or recycle an equivalent product for every product sold. Learn more about Dell Technologies advancing sustainability commitment here. Contact your Dell Technologies representative to discuss your tech refresh opportunities today.

Return to Dell Technologies

2,100PB+ of competitive gear
reused and/or recycled annually

18% of this is reuse
82% is recycling

$530M+ of Dell Tech gear
reused or recycled annually

Responsible recycling in compliance with Dell's Electronic Disposition Policy, executed through our Electronic Disposition Partner (EDP) Performance Standard to:

· Apply Globally Consistent Supplier Standards (ISO 9001, 14001 and 18001/45001)
· Comply with Laws and Regulations
· Prevent Pollution
· Minimize Waste

Annual recycling scorecard

Plastics	52,000+ pounds
Metal	2.2+M pounds
Gold	16+ pounds

30% of Dell Tech returned gear is put toward manufacturing refurbishment, which is not only advancing sustainability but also controlling costs passed to customers.
